EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory LaPointe on 14 April 2006.

The application has been amended as follows:

In claim 11, please amend line 2 as follows --nuclear-fuel metal, ~~wherein~~
comprising reducing metal oxides are reduced to metals--.

In claim 12, line 2, change "comprising" to --comprises--.

In claim 14, line 2, change "comprising" to --comprises--.

Cancel claim 16.

In claim 17, line 1, change "16" to --11--.

In claim 18, line 1, change "16" to --11--.

In claim 19, line 2, delete "removable".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the prior art does not teach or reasonably suggest the claimed method of reducing spent oxide nuclear fuel by reducing the oxides using the device as claimed in a LiCl-Li₂O molten slat electrolyte. The closest prior art is considered to be Redey et al (US 6,540,902), Dees et al (US 6,911,134) and the article authored by Herrmann et al. Each of these

references teaches electrolytic reduction of spent oxide nuclear fuel using a LiCl-Li₂O molten salt electrolyte. However, none of these references, nor any other reference of record teaches or suggests using the structure of the claimed electrochemical reduction device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
